ALERT OFFICE LAUNCHED IN PUDUCHERRY

On September 5, 2023, an MoU Exchange have taken place between ALERT and Mahatma Gandhi Medical College and Research Institute - A unit of Shri Balaji Vidyapeeth (Deemed to be University) in Puducherry. Her Excellency, Dr. (Tmt.) TAMILISAI Soundararajan, Lieutenant Governor of Puducherry and Honorable Chief Minister of Puducherry, Thiru. N. Rangasamy inaugurated ALERT Puducherry launch. The celebration happened in Convention Centre, Hotel Shenbaga, Puducherry with the presence of other dignitaries from various other departments in Puducherry.

SHORT FIRST AID READ OVER TEA

(Excerpts on First Aid from the Indian First Aid Manual Published by Indian Red Cross Society)

First aid is the first assistance or treatment given to a casualty or a sick person for any injury or sudden sickness before the arrival of ambulance. It requires urgent care and transportation of the victim to the nearest healthcare facility.

A first-aider is a term describing any person who has received a certificate from an authorised training body to indicate that he or she is qualified to render first aid on an emergency victim. A Good Samaritan is someone who renders first aid in a voluntary basis to an injured person who is an emergency.

Some of the Indian Good Samaritan Protection guidelines include:

1. After taking an accident victim to the nearest hospital, a First Aider cannot be detained at the hospital. If the first aider is also an eye witness, the first aider should only give his or her home address. No other questions are to be asked
2. A first aider is not liable to any civil or criminal liability
3. The disclosure of name and personal details of first aider to inform the police or emergency services has to be voluntary

Every first aider has the duty of giving care. If the victim is a stranger to the first aider, the first aider has the duty of being reasonable careful while giving first aid. Once a first aider begins to provide first aid, the duty of care is established and first aider is obligated to respond to situations of medical emergency as and when it occurs.

INSTALLATION OF AED AT THE RIPON BUILDING

On September 9, 2023, ALERT initiated a capacity-building measure with the installation of a publicly accessible automated defibrillator at the Ripon Building, Greater Chennai Corporation. The AED installation was inaugurated by Ms. Priya Rajan, Honorable Mayor, Greater Chennai Corporation, and Dr. J. Radhakrishnan, I.A.S., Commissioner, Greater Chennai Corporation on World First-Aid Day. Mr. Shankar Lal Kumawat, I.A.S., Additional Commissioner (Health), Greater Corporation Chennai, Dr. G. S. Sameeran, I.A.S., Joint Commissioner (Works), Greater Chennai Corporation, and Mr. M. Jagadeesan, City Health Officer, Greater Chennai Corporation graced the occasion with their presence as Special Guests. In order to honor the day which was exclusively dedicated to First-Aid Awareness generation, ALERT trained 200 staff members (Public Health Care Department) from 15 zones of Chennai in First Response, performance of CPR and Basic Life Support at the Ripon Building.

What is Automated External Defibrillator?

A cardiac arrest is a medical condition in which the heart suddenly stops beating. An Automated External Defibrillator (AED) is a portable computerized defibrillator which is used to quickly aid a victim who experiences cardiac arrest. Upon opening AED, the user will receive quick instructions on how to safely use the machine, combining the effort of performing cardio pulmonary resuscitation (CPR) and shock delivery to the heart, to save the life of the victim. It is not restricted to hospital setting, and is safe for anyone to use. Thereby, if you come across any emergency or accident in the vicinity around Ripon Building, please save the life of the victim by giving CPR, using AED and other appropriate first aid measures!

Road Safety Campaigns were conducted in Pallikaranai, Sholinganallur and Thudiyalur (Coimbatore) signals by FORD Employees
